Faculty - Adaptive Release: Review Status

You can use Adaptive Release to require students to review a content item before the remaining content becomes available to them. For example, you may want students to read the Student Code of Conduct on our website and mark that they reviewed it before they can progress further in the course.

To set review status restrictions on activities or content items:

1. Navigate to the folder, module or item that will be tracked then click on the chevron to the right of the item.
2. Click on **Adaptive Release**.
3. Several settings can be made on this page but for this example, scroll to the bottom of this page to the **Review Status** section.
4. Click the **Browse** button.

A screenshot of a web interface titled "REVIEW STATUS". The title is in red. Below the title is a horizontal line. The main text reads: "This content item is visible to all users until a Review Status criterion is created. Selecting an item will permit users to mark that item as reviewed." Below this text is a form with a label "Select an item" followed by a text input field. To the right of the input field are two buttons: "Browse..." and "Clear". At the bottom of the form, there is a line of text: "Click **Submit** to proceed. Click **Cancel** to go back." Below this text are two buttons: "Cancel" and "Submit". The "Submit" button is highlighted in red.

5. The course map displays as shown here. Select the item that the student must review before additional content will be made available.

6. Click **Submit**.
